RE: Additional modernizations in the Pittsburgh  
Unified School District including the Asbestos Barrier  
System© of your company

Dear Greg:

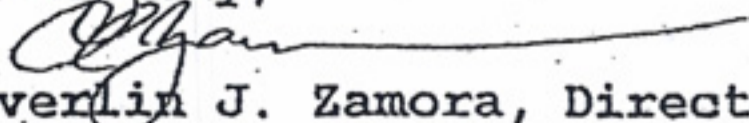

This letter is to confirm that the District will be proceeding towards the end of this summer with the modernization of the Martin Luther King School with approximately 40,000 sq. ft of flooring to be replaced with your System.

Following at about the same time will be modernizations of the Riverside Continuation School and the Foothill School. The first is approximately 28,000 sq. ft. and the second approximately 32,000 sq. ft.

The District has been very pleased with the financial savings and convenience in dealing with the asbestos tile flooring problems by using your encasement System in the five (5) prior school projects now completed over the last two and one half (2-1/2 ) years.

Your System has now been spec'd by the District in the above additional projects, a total of approximately 100,000 sq. ft.

Sincerely,

  
Overlin J. Zamora, Director
